**PennHIP Report**

Referring Veterinarian: Dr Brian Keller	Clinic Name: Countryside Veterinary Clinic (WI)
Email: countrysidevet@frontiernet.net	Clinic Address: 1231 N Knowles Ave New Richmond, WI 54017
	Phone: (715) 246-5606
	Fax: (715) 246-9256

**Patient Information**

Client: Rasmussen, Brianna/Adam	Tattoo Num:
Patient Name: Kinni II	Patient ID: 16357Kinni II
Reg. Name: Kinni II of the Kinni	Registration Num: MB08194301
PennHIP Num: 184917	Microchip Num: 900235000090540
Species: Canine	Breed: GOLDENDOODLE CROSS
Date of Birth: 05 Jun 2022	Age: 8 months
Sex: Female	Weight: 41.2 lbs/18.7 kgs
Date of Study: 10 Feb 2023	Date Submitted: 11 Feb 2023
Date of Report: 12 Feb 2023	

**Findings**

Distraction Index (DI): Left DI = 0.38, the right DI was not computed.  
 Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**  
 Cavitation/Other Findings: Cavitation was present on the right hip. Cavitation is harmless to the hip, however it can artificially and temporarily increase the distraction index. Therefore, no laxity score is provided for the right hip.

**Interpretation**

Distraction Index (DI): One hip cannot be used for the laxity ranking (see Findings). The opposite hip will be used in the analysis. The value of the DI is 0.38.  
 OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.  
 Distraction Index Chart:

**BREED STATISTICS:** This interpretation is based on a cross-section of 3156 canine patients of the GOLDENDOODLE CROSS breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.31 - 0.74) for the breed. The breed average DI is 0.49 (solid square). The patient DI is the solid circle (0.38).

**SUMMARY:** The degree of laxity (DI = 0.38) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
