The parties hereby enter into the following Agreement for the purpose of breeding the two dogs referenced above. The stud fee and costs are to be paid in advance.

The Dam Owner agrees to provide the Stud Owner with a negative brucellosis results from a blood draw collected within 30 days of this breeding. The Dam Owner further agrees to progesterone test by blood draw with their veterinarian to precisely time breeding/insemination to dam's ovulation cycle. The Stud Owner strongly recommends following the IDEXX progesterone chart contained in this Agreement to accurately time the insemination(s).

Both owners represent that their respective dogs are current on their vaccinations, appropriate worming schedule and acknowledge that there are always potential health risks when exposing live animals to other live animals. Each party holds the other harmless with respect to all diseases or events that may occur because of this breeding unless otherwise agreed upon in advance.

The Stud Owner hereby incorporates the stud's pedigree, genetic, color and coat testing results to this Agreement. The Stud Owner completes annual health exam on the stud. Should the Dam Owner choose to perform additional genetic testing on any puppies produced (including breed identification, genetic coat color, etc.), the Stud Owner specifically excludes responsibility of the product of all test results and shall not be held responsible in any way.

The Stud Owner agrees to approve parentage for any applicable kennel club registration resulting from this mating in a timely manner upon the Dam Owner presenting the registration application to the Stud Owner. The Stud Owner reserves the right to DNA test any puppies for correct parentage before confirming the registration application.

The "pick of the litter" option as payment for stud services is to be approved by the Stud Owner in advance. The stud service fee shall be paid in full to the Stud Owner in advance of breeding. If "pick of the litter" option is agreed upon by both parties, the Dam Owner agrees to provide the Dam's pedigree, health, color and coat testing before the mating occurs. The Dam Owner further agrees to allow genetic testing of any puppy(s) produced because of this mating and shall allow Stud Owner to select any puppy from the litter after the puppies are thoroughly evaluated by a veterinarian at approximately 5 - 6 weeks of age. Once the litter has been born and Stud Owner has selected their "pick of the litter" (after litter has reached 3 weeks of age, but no later than 6 weeks of age), the Dam Owner will be refunded a portion of the Stud Service Fee. The Dam Owner shall give/ship the Stud Owner's selected puppy to the Stud Owner or the Stud Owner's agent, along with the puppy's final veterinary check report, vaccination and deworming record, and the AKC registration application signed by the Dam Owner, providing full registration (if applicable) after 7 weeks of age, but no later than 10 weeks of age. After the selected puppy has been received by the Stud Owner, along with all previously stated paperwork, including full breeding rights, in the stated time frame, a refund of the outstanding Stud Service Fee will be issued in full to the Dam Owner. The Dam Owner shall cover the cost of delivery/shipping of the puppy to the Stud Owner. Two puppies constitute a litter. The Stud Owner reserves the right to confirm the whelped litter either in person or by direct communication with the Dam Owner's veterinarian and the Dam Owner grants the Stud Owner communication access directly with that veterinarian for confirmation purposes. If an acceptable puppy, which meets the Stud Owners communicated criteria, is not produced by the breeding, the Stud Service Fee will not be refunded and a puppy will not be exchanged between the two parties.

The Stud Owner cannot guarantee a successful impregnation. The Stud Owner will use a reproductive specialist veterinarian to collect and verify that a good, healthy semen sample is being mailed to the Dam Owner's veterinarian for ai procedures. The Stud Owner will also keep their stud up to date on a negative Brucellosis test. Progesterone testing will help ensure that a successful breeding takes place in either a natural or ai breeding.

The picture(s) of the stud which the Stud Owner provided to the Dam Owner are marked with the Stud Owner's logo/business name. The Dam Owner has the Stud Owner's permission to attempt to advertise any puppies produced by this breeding using these stud picture(s) as provided. The Dam Owner does not have permission to alter these photos in any way and stud credit must be attributed to Kinnickinnic Goldendoodles when advertising the puppies resulting from this breeding. Further, the Dam Owner gives permission to the Stud Owner to share all photos sent to the Stud Owner of the puppies produced for the purposes of future advertisement of the stud's progeny.

The Stud Owner may accept payment via Venmo, Zelle, PayPal, etc. as a convenience to the Dam Owner. The Dam Owner agrees that no chargebacks or disputes will be filed through any financial institution for ANY REASON.

This Agreement is a legally binding document. Any court costs and attorney fees necessary to enforce this contract shall be paid by Dam Owner in the state of Wisconsin and the laws of the state of Wisconsin, county of St. Croix, United States of America will govern the interpretation of this contract.

There are no other warranties, expressed or implied.

### PROGESTERONE INFORMATION

This is a chart provided by IDEXX, which we go by for breeding. Many breedings are done far too early and result in missed impregnation. We would like to minimize missed breedings based on timing. Please follow this chart and give to your veterinarian when planning for a breeding. Please invest in progesterone numbers so you have the best chance to get a litter!

You can usually wait to get the first progesterone number til the 8th day of your females cycle. Please do not stop testing until you've reached a number over 5.

Below 1.0 ng/ml - no ovarian activity - ACTION: Test every 3 or 4 days  
 1.0 to 2.0 ng/ml - rise indicates active ovary - ACTION: Test in 2 to 3 days  
 2.0 to 4.9 ng/ml - active ovary - ACTION: Test every 24 hours until you determine 5.0 ng/ml

5.0 ng/ml - OVULATION

5.0 to 6.0 ng/ml - ACTION - Breed in 2 to 3 days  
 6.0 to 11 ng/ml - ACTION - BREED in 1 to 2 days  
 11.0 to 19.0 ng/ml - ACTION - BREED TODAY  
 Over 19.0 ng/ml - ACTION - BREED IMMEDIATELY if vaginal smear is OK and bitch is still receptive. This is considered LATE if you still have to ship semen. Hope for the best!

Not much can be determined by the numbers over 5.0 ng/ml, but you should not determine breeding date until you get a number 5.0 ng/ml or over.

## STUD SERVICE FEES

**Down Payment: \$600**

(non-refundable and due immediately to schedule your breeding)

**Remaining Balance: \$1900**

(non-refundable and due one week prior to estimated breeding date)

**Total Due: \$2500**

(plus any applicable fees and sales tax)

### **Stud service fee for natural breeding includes:**

3 day stay at our home (boarding included, but please provide the food your dam is used to)

Multiple supervised natural breedings of your dam

Up to date negative brucellosis test on our stud

### **Stud service fee for ai breeding includes:**

Reproduction specialist veterinarian collection of semen (x2 IF NECESSARY)

Overnight shipping of fresh chilled semen to your veterinarian (x2 IF NECESSARY)

Up to date negative brucellosis test on our stud

## "Pick of the Litter" Option

The stud service fees will still be collected as stated above in this scenario

Once the litter has been born and the Stud Owner has selected their "pick of the litter" (after litter has reached 3 weeks of age, but no later than 6 weeks of age), the Dam Owner will be refunded a portion of the Stud Service Fee. After the selected puppy has been received by the Stud Owner, along with all necessary paperwork including full breeding rights, a refund of the outstanding Stud Service Fee will be issued in full.

Dam Owner will also cover the cost of delivery/shipping the selected puppy to the Stud Owner

**Payment can be made via Venmo, Zelle or PayPal**

**The Stud Owner will provide a complete invoice for payment of the above stud service fees and transactions.**

## ACKNOWLEDGEMENT

The Dam Owner understands and agrees to the stud service fees as explained above.
